

CT Energy Incentives

Updated April 13, 2026

All links are at **CTEnergyNetwork.org** →

Rewiring America has a calculator explaining which incentives (mostly state) remain.

← <https://homes.rewiringamerica.org/save>

The **Home Energy Solutions (HES)** visit's co-pay is now **\$40**. It's the fastest, cheapest way to reduce your energy bill. Homes are eligible if an HES has not been done in six years. **Eversource's** HES is at [EnergizeCT.com/energy-evaluations/HES](https://energizect.com/energy-evaluations/HES) →

United Illuminating's is at portal.Uinet.com/HES. Both sites have links to additional energy efficiency incentives, as well as programs for low-income & multifamily households. [Uinet.com/smartenergy/rebatesandprograms/home_energy_solutions](https://portal.Uinet.com/smartenergy/rebatesandprograms/home_energy_solutions) ←

Solar. While the 30% Fed Tax Credit to **purchase** solar is gone for homeowners, **leases or power purchase agreements** will allow licensed solar vendors to factor in this credit until 12/31/27. Find Solar vendors at the CTEnergyNetwork.org site (use the QR code above).

← Read up on the Pros and Cons of Purchasing, Leasing, & Power Purchase Agreements (PPAs) for Solar. Please research carefully! Even without the credit, solar remains one of the cheapest long term forms of energy.

Energy Storage Solutions (Batteries). Get started at the CT Green Bank in the Solutions tab. For purchasing batteries, Homes can access Smart E loans & businesses have CPACE. Many solar vendors also install batteries, and can advise on costs, installation, and compensation. CTGreenBank.com/

Electric Vehicle Incentives. EVClubCT.com has the latest incentive news for EVs and EV Chargers, and also on incentives to offset EV charger installs and compensation for charging off peak.

Smart-E Loans. CT Green Bank loans and other financing are still available for over 90 energy and home healthy upgrades. <https://www.ctgreenbank.com/home-solutions/smart-e-loans/> Perfect for solar and batteries.

Rebates for Energy Upgrades. Commercial, Residential, and Multifamily buildings can receive rebates for some energy upgrades at EnergizeCT.com. An HES visit (other side) may be required.

Whole-Home Energy Counseling. Contact **Home Energy ConneCT** to co-create custom energy upgrade plans at nhsofnewhaven.org/homeenergyconnect/

CPACE (Commercial Property Assessed Clean Energy). CPACE is an upfront financing mechanism for energy efficiency, renewable energy, or other related projects. That means no money down, and repayment is made monthly. CTGreenBank.com/building-solutions/c-pace
